

How reliable is the media we consume during COVID-19?

Team: Pluto to the Moon

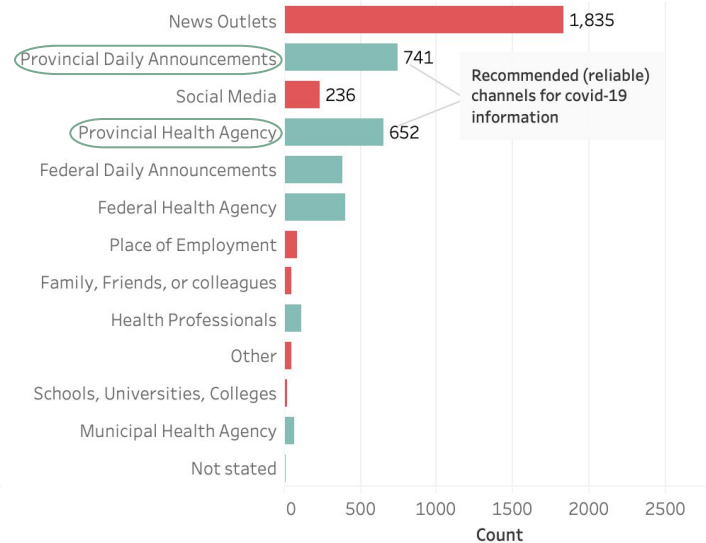

News outlets are generally overvalued by the mass.

Provincial daily announcement and provincial health agency should deserve more attention.

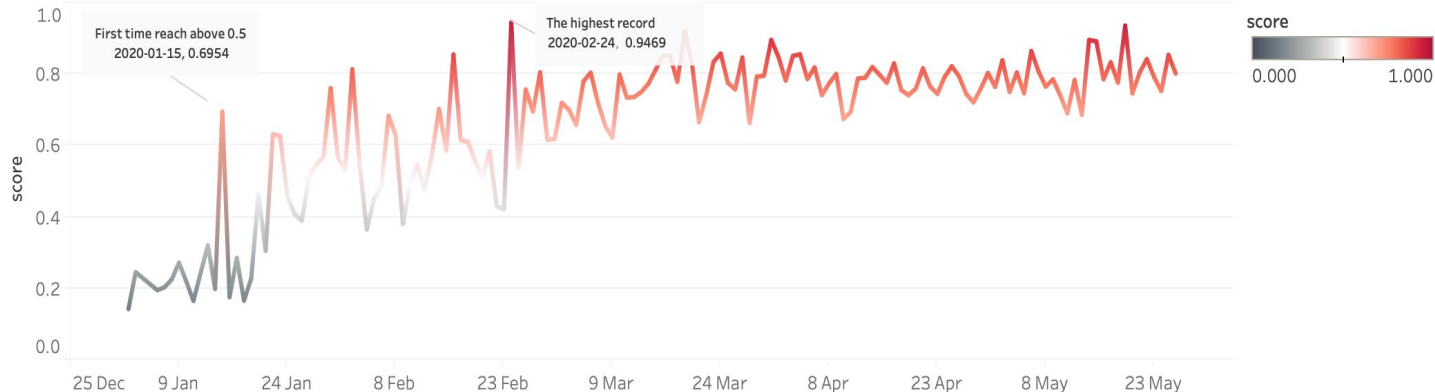

Primary Source of Information

Most Helpful Source of Information

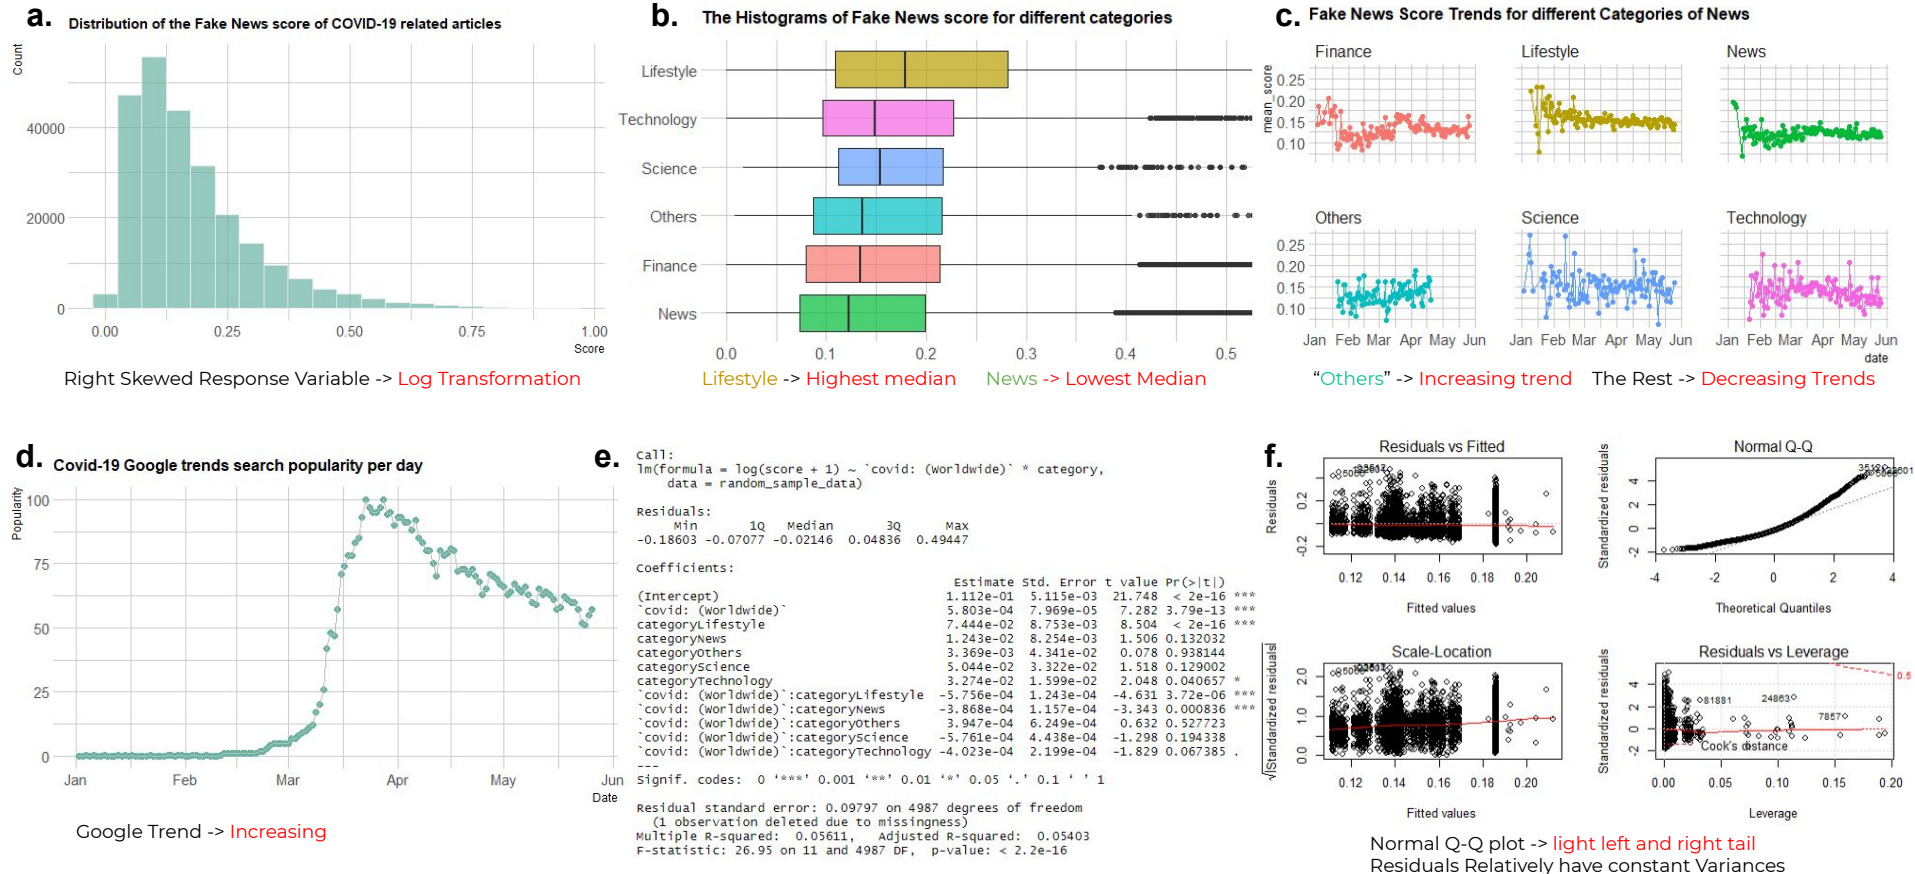

The likelihood of the articles being fake

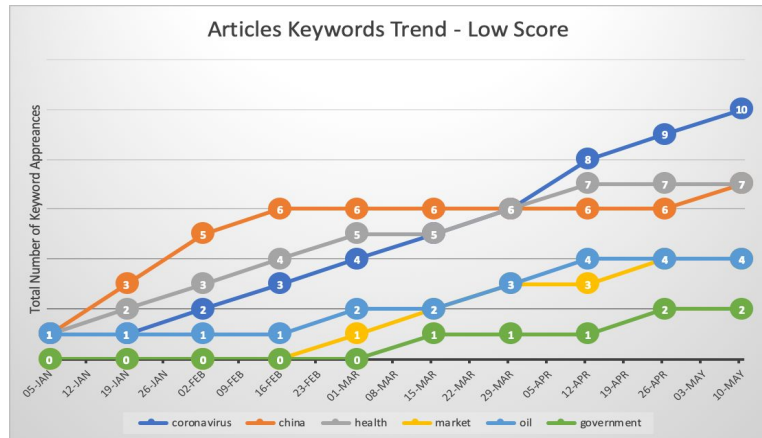

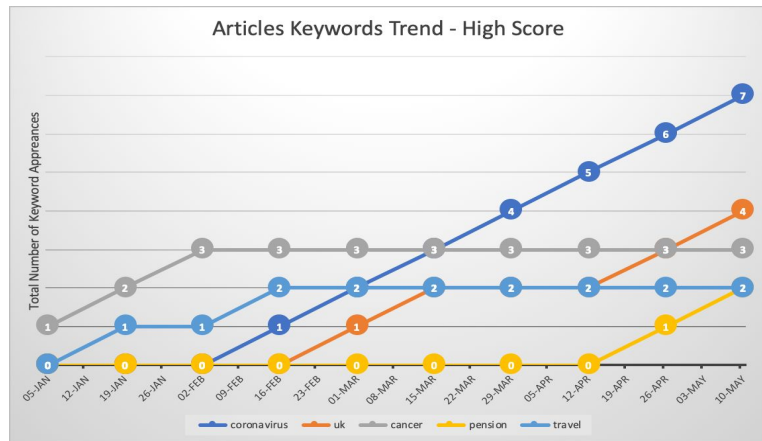

Lifestyle Articles are more likely to have less reliable Covid-19 related contents, whereas **News Articles** are the most reliable sources of Covid-19 information.

The **worldwide search popularity of Covid-19** could **promote** reliable covid-19 information on major websites.

The keyword 'coronavirus' frequently appear in articles regardless of their fake probability score. However, articles that are more likely to be fake have more **financial keywords** like 'price', 'trading', and 'wall street'.

Keywords from High Score Articles	Biweekly Top Keyword Appearances
